

RESPONSIBLE DISCARDING PRACTICES

A call onto all health practitioners towards awareness, engagement & advocacy of responsible discarding practices regarding medication in efforts towards a healthier environment.

18,8%

HIV prevalence
in South Africa

7,2 million people
lived with HIV (PLWH) in 2017

330 000kg of ARV
compounds released
into the environment

1. STOP | REFLECT

- Adherence is key
- Responsible discarding
- Risk of resistance

2. ENGAGE
