Making sense of all information here

MODULES:

The modules/subjects you need register for in your first year. Each module has a module code that is linked to certain module outcomes.

Every module is indicated with a code for easy referencing

Psychology modules start with PSYC. The first number of the code indicates the year level (1 = 1st year) and the second number indicated the semester (2 = 2nd semester).

The complete list of modules that you need to complete to graduate is in your Programme (see next slide)

Module outcomes

In order to pass a module, you need to master the outcomes. You can find all the module outcomes at the end of the yearbook. Pages 183-190

YEAR LEVEL 1

Credits (Cr): Weight of each module. To successfully obtain your degree you need to obtain 392 credits at the end of your three years. This is done by passing modules.

It also indicates the average amount of study hours required to master the content. 1 credit = 10 hours thus 12 credits equals 120 study hours.

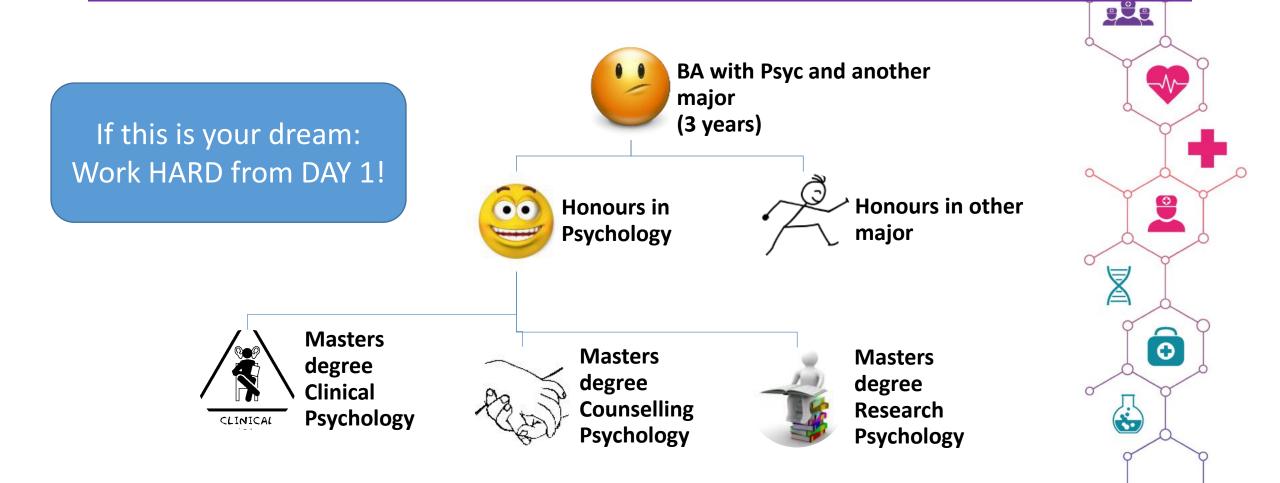

Module type: Code H, X or A

- **H** indicates all your majors
- **X** modules essential for your degree
- but not a major
- A code given for additional modules

There are no options in this programme – all modules are compulsory.

How do I become a Psychologist?

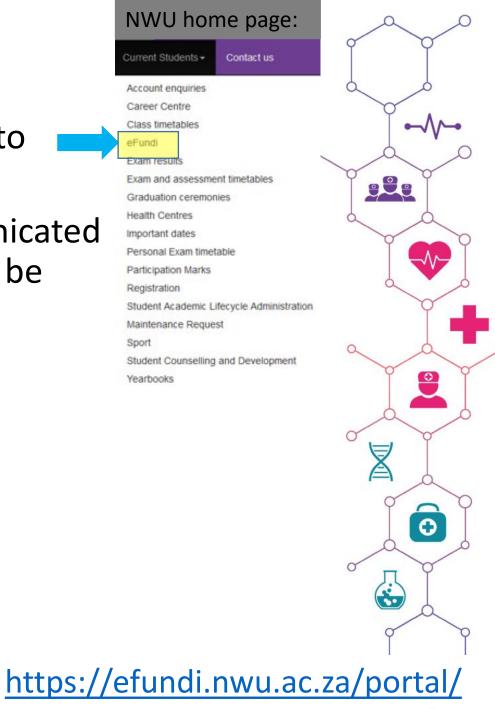

eFundi

Once you are registered, you will have access to eFundi.

All your academic information will be communicated via eFundi and details about each module can be found in the Study guide.

Be ready to adapt and to succeed!

- Important to note: Workload will be much more than in school
- Whether you cope, adapt and succeed depends on yourself
- Take responsibility for your work plan, organize, schedule class and work times each day
- Make sure you understand the work, contact the lecturer when uncertain of what's expected
- Make friends with other students who share your goals
- Use every opportunity to learn and develop
