

Quality in Nursing and Midwifery

Dear Prospective Masters student

Selection process

Thank you for your application to study for your Master's degree in Nursing Science at the North West University.

The supervisors have limited capacity to supervise new students and numbers are restricted through a selection process. In addition to the documents you send with your application, you need to submit the following assignment:

'Discuss a current problem within the health system or in nursing'.

You need to introduce the problem, refer to a few studies that investigated it, and indicate the gap that still needs to be researched. The assignment must be about 2 pages long (Ariel 12) and include at least 5 scientific sources.

As part of the selection process, you may also be invited for an interview / test for academic literacy for postgraduate students.

Yours sincerely

Prof Karin Minnie
Director
